Operax and OSS Integrators Inc. sign North American partnership agreement

Operax, the leading vendor of dynamic Resource and Admission Control solutions for IP service quality, announced today that it has signed a North American reseller partnership agreement with OSS Integrators.

OSS Integrators Inc., a leading provider of business, technology and Network Management consulting and deployment solutions to telecommunications market, will now offer Operax's award winning Resource Controller products to their extensive and growing customer base. This forms part of OSS Integrators growing portfolio of capabilities for telecommunications Service Providers throughout North America. This will help carriers protect and enhance service quality and revenues for advanced and innovative services such as IPTV, Video on Demand and VoIP.

Telecommunications operators are seeking to maximize their Returns on Investment in Next-Generation Networks; providing guaranteed Quality of Service cost-efficiently is a key capability for service performance and differentiation. With new North American headquarters in Boston MA and recent senior additions to the Operax team based in the market recently announced, Operax continues to grow the quality and size of its reseller partner program.

"With standards-based functionality and interfaces, Operax products are particularly attractive to our reseller and delivery partners," said Patrick Kelly, GM Americas, Operax. "This helps to ensure cost-effective and rapid deployment, thus delighting carriers while ensuring end-users are guaranteed service quality for their chosen IP applications. OSS Integrators are highly valued for the experience and value they offer in the implementation of these capabilities in carriers' mission critical environments – we are very pleased to be working with them."

OSS Integrators experienced sales, support, and implementation personnel have planned and implemented Operational Support Systems and Network Management solutions for Fortune 500 and other clients.

"With the ever changing and increasing utilization of technology within the telecom industry, bandwidth management has become essential to ensure customer satisfaction. This differentiator for our customers is what warrants such sophisticated management and analysis methodologies", said Ari Gurewitz, Managing Partner, OSS Integrators, Inc. "The Operax dynamic Resource and Admission Control solution complements our portfolio as a way to effectively manage bandwidth and network resources in real-time using existing Network Management System tools."

About Operax

Operax is an independent software vendor offering innovative solutions for dynamic Resource and Admission Control in IP-based telecommunications. Operax products provide efficiently guaranteed Quality of Service for operators of multi-vendor, multi-service commercial, civil and military networks.

To maximize Returns on Investment in broadband fixed and wireless pre-IMS and IMS networks, providing guaranteed Quality of Service, while minimizing capital and operational costs, is a key capability. It is essential for the successful commercial deployment and operation of new services, such as IPTV, VoIP and Fixed Mobile Convergence.

Operax continues to make extensive contributions in standardization forums. With 22 patents granted or pending, Operax product technologies assure revenue bearing services, ensure emergency calls, and support essential users and services for vital communications networks.

Founded in 2000, Operax is a privately held company with headquarters in Stockholm and offices in Boston MA, London, Rome, and Luleå - Sweden. The company is owned by Nordic Venture Partners, Innovacom, Nomura and Emano, along with its founders. For more information, visit www.operax.com
